

Environmental policy

Aperam Magnetic Components' mission is: by using NANOPERM® the generation, conversion and utilization of electrical energy becomes

safer, more reliable and more efficient.

As the technology leader we develop innovative and sustainable solutions for our customers and partners. We have excellent expertise, and we provide first class service and quality

We are committing our self to environment:

- Fully comply with environmental laws, regulations, ordinances and other requirements that apply to the Company's operations.
- Continuous monitoring of the impact of operations and technology on the environment.
- We are committed to continually improving our environmental performance and reducing waste.
- Maximum emergency preparedness and response.
- Reducing the environmental impact during operation, keeping it on a minimum.
- Use of environmentally friendly raw materials and technology in all processes, focusing on the life cycle of raw materials and products as well as the responsible procurement of raw materials.
- Supporting the design and manufacture of products that increase energy efficiency and help protect the environment as a company involved in renewable energy and electric car manufacturing.
- Supporting our customers in meeting environmental standards and considering the needs of interested parties.
- Considering the reduction of environmental impact when preparing investment and development plans.
- Management assumes accountability and responsibility for effectiveness and ensures pollution prevention. Ensure the availability of resources, committed to continuous improvement.

Managing board is responsible for communicating the Environmental Policy to all persons working for or on behalf of the organization and making it available to the public.
